Sentry adds pharmaceutical finishing services

Sentry Logistic Solutions has enhanced its capabilities with the addition of temperature-controlled labeling, packaging and kitting services to its offering for the bio-pharmaceutical industry.

By utilizing these On-Demand capabilities, pharmaceutical companies can reduce product risk, improve quality control, and enhance product integrity throughout the supply chain.

Jennifer Marcum, Sentry's CEO, said "*Custom Finishing Services are an integral part of the pharmaceutical supply chain. Sentry has the facility, expertise and quality systems to offer these valuable services On-Demand, providing our clients with flexibility in finished product delivery while reducing freight costs and storage fees.*"
